

Architectural Precast Concrete (APC) Design Assist Services

Design Assist Services & the Shockey Partner of Choice Commitment:

Our Design-Assist Services philosophy is intrinsically linked with our corporate vision statement, known as The Shockey **Partner of Choice Commitment**:

“The Shockey Companies will work as partners with our customers. We will establish relationships of understanding and trust that encourage open communication and identification of mutually beneficial solutions. We will join our clients’ efforts in the earliest phases of planning to offer our expertise in material selection, value engineering, scheduling and project management.”

Description of Services:

The Shockey Precast Group’s Design-Assist Program encompasses the following services for our customers:

1. Prepare and update budget proposal.
2. Participate in constructability reviews.
3. Support value engineering options.
4. Attend meetings with the A/E Design Team as required.
5. Provide assistance to the A/E Design Team in the form of construction details, loading concepts and product samples.
6. Participate in regular phone, written, and email communications with the A/E Design Team during the development of the design through 100% Construction Documents.

Frequency of Services:

Typically, our engagement begins when a project is less than 15% designed; however, it can occur anytime before 100% Construction Documents. The Shockey Precast Group will provide the design-assist services listed above with the following frequency:

1. At Core and Shell 100% Design Development Documents.
2. At 10%, 50%, and 100% Construction Documents.
